

Sexual Identity

By Stephan

Please Note:

We may miss pronounce words. We are also going to try to keep personal opinions out of the presentation. Please try to put aside your personal feelings and open up to the things we are speaking about.

What is sexual identity?

“

Sexual identity is how one thinks of oneself in terms of to whom one is romantically or sexually attracted. Sexual identity may also refer to sexual orientation identity, which is when people identify or dis-identify with a sexual orientation or choose not to identify with a sexual orientation.

How is sexual identity determined?

Sexual identity is determined by you. Ultimately there is something that is on your birth certificate though you are the only person who can determine who you are.

How does gender fluidity work

Gender fluidity means that someone is flexible about their gender. This means that they are not set to one gender and they may fluctuate between genders or they may express multiple genders at the same time.

Neutrois

When you identify as agender, neither male nor female, and/or genderless.

Binary

The genders at each end of the gender spectrum (male and female).

Transitioning

The process of using medical means to change your sex.

Binarism

Putting gender strictly into two categories (male and female) and refusing to acknowledge genders outside of male and female.

Demigender

When you feel as if you are one part a defined gender and one or more parts an undefined gender. Terms can include *demigirl*, *demiboy*, *demiagender*, ect.

Aporagender

Somebody with a strong gender identification of themselves that is non-binary.

Poly Gender

When you identify with multiple genders at once. Sometimes referred to as *multigender*.

Novigender

A gender that is super complex and impossible to describe in a single term.

Thank You

We hope that you have learned more about sexual identification and we also hope you kept an open mind and put your personal opinions aside.
